FAIR phytoliths: Increasing the FAIRness of phytolith data

1. We want to know what we do and how we can improve – **Survey**
2. We want to help make phytoliths more OPEN and FAIR – **GitHub**

We need your help!

A recent assessment of data sharing practices within the phytolith community (Karoune 2020) found that only half of the publications shared some form of data and the majority of data was not reusable.

COMMUNITY SURVEY - FAIR Phytoliths:
Increasing the FAIRness of phytolith data

Hello! This short questionnaire is aimed at understanding current practices concerning open science within the phytolith community as part of the project FAIR Phytoliths: Increasing the FAIRness of phytolith data. The project strives to make phytolith data more FAIR (Findable, Accessible, Interoperable and Reusable). This initiative is supported by the International
